Dr. Ara Suppiah - Product Compliance Letter

To Whom it may concern,

Thank you for inquiry the patch's compliance with anti doping policies

Firstly, these patches contain no chemicals or biologically active ingredients - only a signature charge. We sent the patches to be NSF certified only to be told that they couldn't certify them as they had no ingredients.

Secondly, I have used these patches for over a year with my cohort of professional athletes, which includes main draw ATP and WTA players, PGA and LPGA golfers, NBA and NFL athletes, all of whom are regularly tested by WADA. We have never failed a drug test.

Lastly, as a highly respected medical physician, chief medical analyst for NBC's Golf channel and chief medical officer for Orreco, I am only one failed drug test away from losing my credibility and these positions, which I have worked hard for. As such I am beyond careful with my prescribing habits and will not jeopardize my or my athletes stellar reputation and career. And I have no hesitation using this product with my athletes.

I have toured the factory, spoken to the formulator and scientist. These patches have no chemicals, there is no risk of side effects, contamination or cross reaction. They are safe.

Please feel free to contact me should you have any other questions.

Ara Suppiah MD

Sports and Emergency physician
Chief Medical Officer for NBC's Golf Channel
Chief Medical Officer for Orreco USA
2016/2018 US Ryder Cup team physician
Assistant a Professor University of Central Florida
